### **Astrology and Profession**

The summary of the Professional Profile has been made on the basis of the planetary configurations of your natal birth chart.

Vedic Astrology is an ancient behavioral analysis and forecasting system. It employs a diagram of the positions of the planets relative to the earth and sky based on the time and place of a person's birth. This is known as the Birth chart or the Natal Chart. An astrologer reviews this chart to find information about an individual's disposition and character, strengths and weaknesses and may foretell events in a person's life.

Astrology helps people make right decisions. Astrologers can help you understand whether the astrological signatures indicate a slump or a surge and what might be the anticipated duration of either one so you can take the most advantage of a positive period.

This means they are lucky to reap more than what they sow. There are second group of people, they reap in exact proportion to what they sow. Finally the third group is somewhat unlucky, in spite of best efforts, the reward and recognition they get are not commensurate with their efforts. They reap less than what they sow. We call this reward to effort ratio in the chart and is computed by dividing the 11th house ashtakbarga strength with the ashtakbarga strength of 10th house.

### **Weakness**

Your main characteristic is conflict. You are continuously pulled in two different directions by two opposing forces. You want to be in two different places at the same time, to do two different kinds of jobs at the same time. So, you very often engage in a second activity before completing the first one. Praise by others makes you happy like a child, even though, at times, that praise is unreasonable or false. It still makes you happy. This is one weakness, which a selfish person might exploit to serve his own end. You may not like to accept this analysis of your nature but if you look at it objectively, you may find that it is a true analysis.

The Dasha Vichar or planetary periods of Vedic Astrology provide a unique and comprehensive system for judging the effects of planets throughout the development of our lives. They are the most accurate system for showing how the planets distribute their effects through time and the different stages of our lives. The most common of these systems of planetary periods is the Vimshottari Dasha or the '120-year cycle'. This follows a predetermined sequence, the starting point of which is determined by the longitude of Moon at the time of birth.

In it, each of the seven major planets plus the two Lunar Nodes are given specific periods. This entire life span is divided into different main periods of planets and within this main period, there are sub-periods of all the planets and then each sub-period can be divided into sub-sub-periods of planets. The effects of the planets become most operative during the Main Dasha or the sub-Dasha. The transit effects and the relation between the Main planet and the sub-planet also determine whether the good effects will be more predominant or the bad ones.

Based on the Dasha system in your chart we are giving you the best and the worst periods in your professional life.
