For each person, at the time and place of birth, there is a specific astronomical pattern in the heavens. This sky model is recorded from a distinct geographical point. Astrologers document this planet-earth-sky pattern and it is known as a Chart, which records the following:

- ❖ Where the Planets are in the sky-by listing their location in a constellation or Sign of the Zodiac.
- ❖ The location on earth-by using latitude and longitude; these are called Houses.
- ❖ Which sign is on the horizon, or that part of the sky east of the birth location, at the time of birth-this point is called the rising sign or the Ascendant.

The three most significant components of a Birth Chart are the Ascendant, Planets and Houses. The Birth Chart is called a horoscope (from Greek horo, indicating time, and scope, meaning to look at). In India, the chart is called the Chakra (wheel) or Janma Kundali.

An Astrologer interprets your Birth Chart by analyzing the interaction and influence of Planets, Ascendant and Houses in the Birth Chart. Life patterns seen in the birth chart are matched against the patterns seen in historical rules and records of parallel astronomical information. For predictive purposes, the location of the planets from sign to sign, and house to house is tracked to locate when circumstances will emerge or when the planets will cross a sensitive point in the birth chart stimulating a specific event.
